Outstanding on crew and voyage news... let us know when electrical issue resolved and or if you need us to mobilize anything.

**Subject:** Daily report.

Good morning all,  
We've had a small issue with one of the legs of 120v ac. It is the one that starlink is hitched into. The only immediate impact is that I don't have access to the internet on my laptop.

Position is just exiting the St. Lambert lock in Montreal. That is the last lock of the Seaway. We're bound the 130 nm to Quebec City and have an ETA of early tomorrow morning. Communication plan is to work to resolve out electrical issue and be back online soon. We've solved our 2nd mate issues as well. Paul Bracken will join us in QC until the end. Both him and the engineer are due to join the ship on Friday 5/23.

Best,  
Greg
